1. The following is an examiner's statement of reasons for allowance: Chang et al and Krishna et al (newly of record with the IDS filed January 10, 2001) is directed to measurement of second harmonic doppler amplitude versus applied acoustic pressure or pressure of transmission. None of the cited art, alone or in combination teaches or suggests a method of measuring hydrostatic pressure by correlation to a calibrated correlation curve or contrast agent adapted for measuring pressure wherein the microbubbles are adapted to change significantly in size under application of pressure so as to optimize the sub or ultraharmonic response as an indication of pressure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication should be directed to Examiner Francis J. Jaworski at telephone number (703) 308-3061.
